

Password Reset - Member & Staff Guide

This guide covers every scenario for resetting an online banking password at Blossom Banking, from self-service resets via email link to staff-assisted resets through the Administration Portal.

1. Self-Service Password Reset (Recommended)

Most members can reset their own password in under two minutes without contacting support.

Via Email Link:

- On the login page, click 'Forgot Password?' below the password field.
- Enter your username or registered email address and click 'Send Reset Link'.
- A password reset link is emailed to your registered address within 2 minutes.
- Click the link - it is valid for 30 minutes and can only be used once.
- Choose a new password that meets Blossom's complexity requirements (see Section 3).
- Confirm the new password and click 'Save'. You are automatically logged in.

Via SMS Code (if mobile number is registered):

- On the 'Forgot Password?' page, select 'Text me a code instead'.
- A 6-digit code is sent to your registered mobile number.
- Enter the code within 5 minutes.
- Set your new password and confirm.

Note: If you changed your email or phone number recently and cannot receive verification, proceed to the In-Branch or Phone Reset option below.

2. Password Reset via Phone (Member Support)

Call Member Support at 1-800-BLOSSOM (1-800-256-7766). Agents can initiate a forced reset after verifying identity. The member will receive a temporary one-time link by email.

- Agent verifies: full name, DOB, last four digits of account number, and security question.
- Agent sends a password-reset email link to the email on file.
- Member opens the link and sets a new password.
- If email is inaccessible, agent can arrange for an in-branch identity verification.

3. Password Complexity Requirements

All Blossom Banking online banking passwords must meet the following criteria:

- Minimum 12 characters.
- At least one uppercase letter (A-Z).
- At least one lowercase letter (a-z).
- At least one digit (0-9).
- At least one special character: ! @ # \$ % ^ & * () _ + - = [] { }
- Cannot contain your username, first name, or last name.
- Cannot reuse any of the last 10 passwords.

- Cannot be a common password (checked against known breach lists).

4. Staff-Initiated Password Reset (Back Office)

Support agents and branch staff use the Admin Portal to trigger a password reset on behalf of a member. This sends the member a secure reset link.

Steps:

- Admin Portal > Member Management > locate member by username or account number.
- Click 'Security' tab, then 'Force Password Reset'.
- Select delivery method: email or SMS.
- Confirm with your agent ID. An audit entry is created automatically.
- Notify the member to check their email/SMS immediately (link expires in 30 min).

Important: Do not share the reset link verbally or via chat. The link is single-use and contains a time-limited token tied to the member's account.

5. Password Expiry Policy

Blossom Banking does not enforce mandatory password rotation for consumer accounts. However, staff and admin accounts must change passwords every 90 days. Members are encouraged to update their password annually.

6. Troubleshooting Common Issues

Reset link expired

Links expire after 30 minutes. Return to the 'Forgot Password?' page and request a new link. If the problem persists, check that your system clock is accurate and cookies are enabled.

'Password does not meet requirements' error

Review Section 3 above. Common mistakes: not enough characters, missing a special character, or reusing a recent password. Try a passphrase approach (e.g., 'Maple\$Sunrise9!') for an easy-to-remember compliant password.

I never received the reset email

Check your spam and junk folders. Emails come from noreply@blossombanking.com. If it is not there after 5 minutes, verify that the email address on file is correct by calling Member Support. Add noreply@blossombanking.com to your trusted senders list.

I cannot access the email address on file

Visit any Blossom branch with a government-issued photo ID. Staff will verify your identity, update your email address, and initiate a password reset in one visit.
