

Username Recovery - Finding or Changing Your Username

Your Blossom Banking username is required to log in to Online and Mobile Banking. This guide covers how to retrieve a forgotten username, change your username, and how staff can assist members who cannot self-serve.

1. Retrieving a Forgotten Username Online

Members can look up their username using verified personal information. The username is then revealed on-screen and sent to the registered email.

Steps:

- Go to blossombanking.com and click 'Forgot Username?' on the login page.
- Enter the email address registered to your account.
- Enter your date of birth and the last four digits of your primary account number.
- Click 'Find My Username'.
- Your username is displayed on-screen and a copy is emailed to you.

Note: For security, only the first two and last two characters of the username are shown on-screen. The full username is sent only to the verified email address.

2. Retrieving a Username via Phone

Call Member Support at 1-800-256-7766. After verifying your identity, an agent will send your username to the email address on file.

- Verification required: full name, DOB, last four of account number.
- Agent sends a secure message containing your username to your registered email.
- Agents cannot read out usernames over the phone for security reasons.

3. Username Policies

- Usernames are 6-30 characters and may include letters, numbers, underscores, and periods.
- Usernames are case-insensitive.
- Usernames must be unique across all Blossom Banking members.
- A username cannot be your email address, full account number, or Social Security Number.
- Usernames can be changed up to once every 90 days.

4. Changing Your Username

Self-service (online):

- Log in and go to Settings > Profile > Username.
- Enter your new desired username and click 'Check Availability'.
- If available, confirm your current password to authorize the change.
- An MFA code is sent to verify the change.
- Enter the code and click 'Update Username'.
- You will be logged out and must log in with your new username.

Via Member Support:

- Call or visit a branch. Complete identity verification.
- Provide your desired new username.
- Agent checks availability and makes the change in Admin Portal.
- A confirmation email is sent to the registered address.

5. Username Not Recognized at Login

If your username is not being accepted, work through the following checklist:

- Confirm you are using the correct username (not your email address by mistake).
- Remember that usernames are case-insensitive, so capitalization does not matter.
- Check for auto-correct or auto-fill substituting an incorrect value.
- Use the 'Forgot Username?' flow to confirm your username.
- Verify that you are logging in at the correct site: blossombanking.com.
- If you recently changed your username, use the new one.
- If your account was recently transferred from a legacy system, your username may have changed. Check the migration email Blossom sent or contact support.

6. Staff: Username Management in Admin Portal

Staff can look up, display (partially masked), or change a member's username after proper identity verification.

To display a member's username:

- Admin Portal > Member Management > search by account number or email.
- Click on the member record. Username is shown partially masked.
- Click 'Reveal Username' (requires agent re-authentication).
- The full username is displayed and logged in the audit trail.

To change a member's username:

- Admin Portal > Member Management > select member > Profile tab.
- Click 'Edit Username'.
- Enter the new username and click 'Check Availability'.
- Confirm and submit. A confirmation email is sent to the member.
- The member's current session (if any) is invalidated.

Important: Username changes take effect immediately. Inform the member that they must use the new username for all future logins.
